Product Description

This is a very easy to use low cost semiconductor Gas sensor Module with analog and digital output. This module uses MQ6 LPG gas sensor as a gas sensing element. It requires no external components just plug in Vcc & ground pins and you are ready to go. For Digital output the threshold value can be easily set by an on-board potentiometer. Using this module you can easily interface MQ6 LPG gas Sensor to any Microcontroller, Arduino or even Raspberry Pi.

Features of MQ6 LPG Gas Sensor Module:

- High Sensitivity to LPG, iso-butane, propane
 - Small sensitivity to alcohol, smoke
 - Good sensitivity to Combustible gas in wide range
 - High sensitivity to Propane, Butane, LPG and also response to Natural gas
 - Long life and low cost
 - Simple drive circuit
-

Applications of MQ6 LPG Gas Sensor Module:-

- Gas leak detection system
- Fire/Safety detection system
- Domestic gas leakage detector
- Industrial Combustible gas detector
- Portable gas detector
- Gas leak alarm
- Gas detector
